SUPERIOR SOLUTIONS FOR

AGRICULTURAL VEHICLE LIFTING

STERTIL
SUPERIOR SOLUTIONS BY
QUALITY PEOPLE

Superior solutions by quality people

The Stertil Group provides customized and technically advanced solutions for heavy-duty lifting requirements for customers throughout the world, including the best possible service from skilled local partners. These superior solutions are conceived, developed and implemented by a team of professional specialists with unique expertise. Thanks to the quality of its people, its entirely in-house production and its international organization, Stertil is the number one heavy duty vehicle lift company in the world. In addition to the commercial vehicle market, Stertil-Koni has a sharp focus on the agricultural sector, developing specific lifting solutions for agricultural vehicles and towed equipment.

Ergonomic, safe and time-saving

Maintenance of agricultural machinery is often performed lying down, or sitting beneath the vehicle. The usual lifting aids such as jacks, overhead cranes and forklifts provide insufficient safety and as a consequence, mechanics often have to work in unsafe and limited space underneath the machinery or vehicles.

Stertil-Koni vehicle lifts provide a complete ergonomic and safe solution, allowing the mechanic to stand while repair or maintenance work is carried out. Tractors and other heavy vehicles with large tires can be lifted safely, quickly and efficiently. The versatility of the various Stertil-Koni vehicle lifts permits a wide range of machinery and vehicles to be lifted with the same vehicle lift.

SAFE EFFICIENT

DURABLE and PERFORMANCE-DRIVEN

Stertil-Koni wireless mobile column lifts

From the longest trailer to the widest combine harvester, from a single axle to a ten axle articulated vehicle, Stertil-Koni wireless mobile column lifts provide the superior lifting solution. They are engineered to be very versatile for lifting a wide range of agricultural machinery and vehicles safely with an ideal working height adjustable within seconds. In any suitable location, in a wireless controlled configuration, All Stertil-Koni mobile column lifts enables synchronized lifting and lowering every time.

Stertil-Koni mobile column lifts also feature the ebright Smart Control System - an easy-to-use touch-screen display.

Stertil-Koni Universal Solutions

Stertil-Koni has developed a number of special adapters and other accessories for agricultural vehicles, such as an adjustable wheel clamp and a wider crossbeam. In a three-column configuration for towed equipment, the mobile column lifts are fitted with a special 'pin and ball tow hitch.' With capacities of up to 154,000 lbs per lifting system, Stertil-Koni can help you lift heavy agricultural machinery and vehicles at the touch of a screen.

- **Independent mechanical locking system**
Engages after 5" lifting stroke.
Locking pawl engaged by gravity.
- **Locking System**
With increments of 1 3/8".
- **ebright Smart Control System**
- **Obstruction protection**
- **Automatic overload protection**
- **Reliable hydraulic system with long life cycle technology**
