

ST 4250 - 54,000 lbs.

The ST 4250 is one of the vehicle lifts that are free of cross beams. This ensures perfect access to vehicles and the lift. Because there are no cross beams, the ideal working width for the setup can be easily chosen, depending on the type of vehicles to be serviced.

The premium features of the lift include:

- Free of crossbeams
- Drive on height of just:
 - #11" for the 19' - 8 1/4", 26' 3", 29" - 6 3/8" tracks
 - #12 3/4" for the 32" - 9 3/4", 37' - 8 3/4" tracks
- Controlling the lift is made easy and safe for the user from the well-positioned control panel.
- Entirely electronically controlled
- The LCD screen can also be used to display system information.
- The patented independent mechanical locking mechanism system is always active.
- We give a lifetime warranty on the maintenance-free synthetic runner wheel system.
