

More innovative, ecologically friendly lift designs from Sterfil-Koni

- The ECOLIFT - the industry's *original* ultra-shallow, full-rise in-ground axle engaging lift
- High pressure, low volume hydraulics, with only 3.5 gallons per scissor
- Capacities of 60,000 lbs (2-scissor) or 90,000 lbs (3-scissor) can lift any heavy duty bus or truck
- Ultra-shallow 34 inch pit depth
- Front bolster recesses flush to the floor anywhere in the front pit travel...a feature called Continuous Recess™. Not limited to one pocket location.
- Double lock jaws made of high strength T-1 steel with a unique press-to-lock function, a safety feature not available on any other axle engaging lift
- All ECOLIFTs are ALI/ETL certified
- Available in various travel ranges
- Available with optional intrinsically safe remote pendant
- Proudly made in our Streator, Illinois factory
