

The Stertil-Koni in-ground piston lift offers a broad range of options, including telescopic 2 stage pistons, full length single stage pistons, and concrete pit or steel cassette installations

- Environmentally friendly, with hydraulic power units attached directly to the cylinders - no hoses or pipes.
- Electro-hydraulic synchronization keeps lifting cylinders equalized
- A tall 75 inch rise for all pistons.
- Hard chrome plated pistons for long life
- Piston capacities in either 32,000 lbs and 50,000 lbs.
- Manual lowering
- Low head plate height of just 2.75 inches for easier drive over when not recessed
- Remote pendant standard
- ALI/ETL Certified
