

No one offers a more comprehensive choice than Stertil-Koni. We are truly the world leader and sell more mobile lifts than any other manufacturer because of the following unique features:

- We only use high quality, high tensile DOMEX steel --- the highest quality steel available from select steel mills.
- Hydraulic operation for rapid ascent and descent.
- No compromise with **SAFETY**
 - Independent mechanical locking pawl (tested at 3:1 safety)
 - Gravity-fed locking system (uses NO springs which can rust or distort)
 - 1 ¼" locking intervals on carriage
 - 3 level redundancies (mechanical, electrical and hydraulic).
 - Hose burst valve for protection against catastrophic line rupture
 - Self diagnosis and troubleshooting protocols (minimum 25 codes)
- Lifting height 69"
- Patented gas shock to provide overload protection for pallet jack
- Approved for outdoor as well as indoor use.
- All models and all options (up to 18,000 lbs) per column are ALI/ETL Certified for 50 state use and CSA for Canada
- All models use integrated MICRO-PROCESSOR based printed circuit boards.
- Customer can choose between synthetic front roller wheels for reduced floor loading or unique retractable wheel pedestal base to virtually eliminate floor loading
- Advanced design synthetic carriage guide rollers (4) for smooth operation, with limited lifetime warranty for parts only.
- Very low maintenance requirements.
