

Sterfil-Koni SKYLIFT

Smart designs like this only come around every 50 years. This is typical of Sterfil-Koni engineers who are the smartest in the industry. A lift that incorporate all the best features of a platform lift, provides a totally free CLEAR FLOOR concept. The two independent runways have no connection to get in the way of operator movement or under chassis access. The modular design allows for flush mounted or surface mounted installation and encourages various lengths to be incorporated in a single lift. The lift was designed with ease of installation in mind. Two factory authorized installers can install the lift in one day! Reach for the SKY! [Read more](#)
