

ST 1060 Wireless 13,000 lbs.**ST1060 WIRELESS MOBILE LIFT MODEL SPECIFIC FEATURES**

A set of ST 1060FWF mobile lifting columns has a control box on every column, enabling operation from any of the columns. It is possible from any column to operate the columns individually, in pairs or as many as 8 columns together. The control boxes are standard IP 65 splash proof. With one set of four lifting columns you have a lifting capacity of 52,000 lbs. at your fingertips.

The ST 1060FWF is specially designed to hoist vehicles such as buses, heavy trucks and aircraft tractors. The system is standard capable of expansion to a maximum of 8 columns per set.

The fixed pick-up fork has a length of 14 inches. This enables vehicles fitted with super single drive axle tires to be picked up. The ST1060FWF has a lifting height of 69 inches. With a lifting time of just 94 seconds, the ST 1060 wireless is one of the world's fastest lifting columns
